Education

Indian Institute of Information Technology, Kalyani

Kalyani, India

B.Tech in Computer Science and Engineering

2024 – 2028

CGPA: 9.03 / 10.0

Technical Skills

Programming: Python, C++, Java

Machine Learning: Supervised Learning, Regression, Classification, Feature Engineering, Model Evaluation, Cross-Validation

Deep Learning: Neural Networks, CNNs, Backpropagation, Transformers

NLP & LLMs: TF-IDF, Tokenization, Word Embeddings, Retrieval-Augmented Generation (RAG), Prompt Engineering

Frameworks & Tools: LangChain, LangGraph, FAISS, Scikit-learn, NumPy, Pandas, Matplotlib, Streamlit

Core CS: Data Structures and Algorithms, OOPS(going on), Operating Systems

Version Control: Git, GitHub

Projects

Enterprise Knowledge Copilot (RAG-based LLM System)

Ongoing

- Built an AI-powered assistant using Retrieval-Augmented Generation (RAG) to answer queries from enterprise documents.
- Designed document ingestion pipeline with chunking and vector embeddings using FAISS for semantic search.
- Integrated LangChain with LLM APIs for context-aware response generation.
- Improved response relevance through embedding optimization and retrieval validation.

LangGraph AI Chatbot (Persistent Multi-Threaded LLM System)

[Live Demo](#)

- Built a production-style AI chatbot using LangGraph for stateful workflow orchestration and multi-thread conversation handling.
- Integrated HuggingFace LLM API with streaming responses for real-time interaction.
- Implemented persistent memory using SQLite checkpoints for conversation restoration.
- Designed modern UI with Streamlit including message timestamps, conversation management, and markdown rendering.
- Deployed publicly on Streamlit Cloud with secure API key management.

Book Recommendation System

[Live Demo](#)

- Developed a content-based recommendation system using TF-IDF vectorization and cosine similarity.
- Processed and analyzed 10,000+ book descriptions for personalized recommendations.
- Tuned similarity thresholds to improve recommendation relevance.
- Deployed interactive web application for real-time recommendations.

WhatsApp Chat Analyzer

[Live Demo](#)

- Built a data analytics dashboard to process and visualize 50,000+ chat messages.

- Performed statistical analysis and trend extraction using Pandas.
- Designed interactive visualizations using Matplotlib and Streamlit.

Achievements

- 2nd Runner Up, InnovateX Hackathon (GDG On Campus IIIT Kalyani) for developing an AI-based solution.
- Winner, Botball Robotics Competition at IIIT Kalyani.
- Codeforces Rating: 943.

Leadership Experience

AI/ML Lead, GDG On Campus IIIT Kalyani *2024 – Present*

- Conducted workshops on Machine Learning, Deep Learning, and LLM systems.
- Mentored students in building applied AI and NLP projects.

General Secretary (Technical Affairs), Gymkhana IIIT Kalyani *2024 – Present*

- Organized hackathons, coding competitions, and technical workshops for 200+ participants.

Interests

Machine Learning, Deep Learning, Large Language Models, Robotics, Competitive Programming
